Survey Notes

These results are from a Saint Anselm College Survey Center poll based on online surveys of 1194 New Hampshire Republican Presidential Primary likely voters. Surveys were collected between January 8th and 9th, 2024, from cell phone users randomly drawn from a sample of registered voters reflecting the demographic and partisan characteristics of the voting population. Candidates were presented in random order for the favorability and ballot preference questions. The survey has an overall margin of sampling error of +/- 2.8% with a confidence interval of 95%. The data are weighted for age, gender, geography, and education based on a voter demographic model derived from historical voting patterns, but are not weighted by party registration or party identification.

Summary

New Hampshire Institute of Politics Executive Director Neil Levesque summarized the results, saying, "After a remarkable climb through the summer and fall, former Ambassador Nikki Haley seems to have leveled off and remains somewhat short of catching former President Donald Trump. As the candidates head into the home stretch, Trump still holds a lead, but the effect of former New Jersey Governor Chris Christie suspending his campaign remains to be seen."

Former Ambassador Nikki Haley's momentum appears to have slowed. 31% of respondents indicate that they would support her in the upcoming primary, up just a single point from the Survey Center's last poll in December. However, Haley will likely be the primary beneficiary of former New Jersey Governor Chris Christie's exit from the race, so she will likely continue to gain ground on former President Donald Trump down the stretch.

Donald Trump's support remains unwavering. Trump is the choice of 45% of respondents, up a point from December. Trump has remained within a handful of points of that 45% support since last March despite a limited schedule in New Hampshire and skipping debates; it's likely that he will carry that support into Primary Day.

Haley wins voters that dislike Trump, while DeSantis and Ramaswamy appeal to voters that like the former president. 78% of Haley supporters and 100% of Christie supporters have an unfavorable impression of Trump, while 76% of DeSantis supporters and 74% of Ramaswamy supporters have a favorable impression of Trump. As a result, Christie supporters looking for a new candidate will likely find more common ground with Haley.

Trump holds significant advantages on the issues that matter most to Republican primary voters. He leads Haley 48%-33% among voters most concerned about the economy and inflation, 61%-20% on immigration, 41%-35% on government spending and taxes, and 47%-36% on national security.

Assuming he's the Democratic nominee, President Joe Biden will face a Republican nominee that will have work to do in consolidating his or her party. Trump would get the greatest support in a general election from Republican primary voters, with 68% saying they would vote for him over Biden. Florida Governor Ron DeSantis would get 65%, Haley would get 64%, and entrepreneur Vivek Ramaswamy would get 60%.

About SACSC

The Saint Anselm College Survey Center (SACSC) was founded in the wake of the 2016 election, and launched its first poll in February 2018 as the midterm elections were getting underway. Housed within the New Hampshire Institute of Politics at Saint Anselm College, the Center conducts quarterly polls of New Hampshire voter attitudes and additional polls as circumstances warrant. This research supports the academic mission of the College, and provides students with a practical education in survey techniques while providing the public at large with insight into political opinion trends that impact the state's federal and gubernatorial elections. To support its operations, the Center performs commissioned research on behalf of nonprofit organizations and corporations.
